

# Travel Training

## What is it?

CobbLinc promotes and supports the use of local fixed route service as an alternative to paratransit service. We seek to work with agencies, seniors, and individuals with disabilities to teach them how to safely and independently ride public transportation. This is a free service.

## How do we do it?

We combine a classroom experience with field training. A teaching session about the fixed route service is scheduled. A trip is planned so that students gain experience with the fixed local routes.

## Why do we do it?

Using the fixed-route system can open up opportunities for our residents. Participants will gain the confidence to maneuver the local fixed route system. We aim to increase the independence of our residents.
